

- **The phenomenal elimination capability of active oxygen radical was confirmed.**

It was verified that 86.5% of active oxygen was eliminated one hour later of the application as a result of the antioxidant capability test on free radical OH (Hydroxyl radical).

Measurement method: Electron Spin Resonance (ESR) Specimen: It is assumed that 1000mg of the powder in 100ml water is taken. The testing institute: Designer's Food Co., Ltd.
